

General NIV Form OMB Submission

User Interface Design Presentation V4

General Requirements

- The system shall enforce a worldwide consistent data collection for all general non-immigrant visa applicants, so that there is only one application process.
- The system shall dynamically present questions that are relevant to the user's application process.
- The system shall not display duplicate questions or substantially overlapping questions.
- The system shall display commas to show thousands, millions, etc. (e.g. 1,000; 1,000,000; etc.)
- The system shall automatically calculate totals.
- The system shall require the user to enter at least the month and year for all dates with the exception of date of birth, where only the year is required.
- The system shall determine if the user is the principal applicant or dependent, which will trigger different questions.
- The system shall require the user to populate all fields unless 'Optional' or 'If shown on passport' is displayed or if the user checks a corresponding 'Do Not Know', 'Does Not Apply', or 'Not Applicable' checkbox.
- The system shall not allow the user to remove the last item from a list if there is no leading question that triggers the list.
- If a leading question triggers additional fields and the user removes the last item from the list, the system shall automatically switch the answer to the leading question to the opposite answer (i.e. if 'Yes' to a question triggers additional fields, then the system will default the answer to 'No' if all items from the list are removed.)
- The '+Add Another | -Remove' functionality shall be displayed under the blue box it is intended for. When the user clicks on '+ Add Another', the system shall duplicate all fields in the blue box.
- The system shall not allow the user to enter non-English characters except when populating the 'Full Name in Native Alphabet' field on the Personal 1 Information page.
- The system shall allow the user to enter special characters only on e-mail addresses and phone number fields.
- The phone number fields shall accept alphanumeric characters to allow the user to enter extensions.
